Total Record Count

549

**This scorecard displays the total number of helpdesk tickets recorded in the dataset. This gives an overall idea of the volume of tickets handled.**

**The pie chart provides a breakdown of tickets by their source. It helps in understanding which channels are most frequently used by users to raise tickets.**

**This bar chart shows the distribution of tickets based on their priority. It highlights the number of high, medium, and low-priority tickets, helping to identify the urgency level of the issues reported.**

**This chart categorizes tickets by type. It helps in understanding the common issues or requests received, such as technical support, service requests, or inquiries.**

**The bar chart displays the number of tickets assigned to different departments. It helps in identifying which departments handle the most tickets and may require additional resources.**

**This chart shows the distribution of tickets based on their current status. It helps in tracking the workflow, such as how many tickets are open, in progress, or resolved.**
